

Dear Recruiting Team,

I am a final-year BSc Computer Science student at Ashesi University, excited to apply for the Summer Analyst Internship in the Global Corporate Banking division. The commitment to delivering strategic financial solutions and fostering client success aligns with my passion for solving complex problems through data-driven insights and teamwork, as demonstrated in my academic projects and leadership experiences.

At Ashesi, I developed a hospital management system with a multilingual chatbot to assist patients, showcasing my ability to integrate technology with user-focused solutions. My work on a Spotify popularity predictive model, where I achieved optimal results using Gradient Boost, honed my analytical skills and attention to detail—qualities essential for supporting deal execution and financial analyses in your division. Additionally, building an e-commerce platform for African goods strengthened my ability to handle secure data and deliver responsive, client-centric applications, preparing me to contribute to your client portfolio management and research tasks.

Conversations with Ashesi peers and alumni who interned at Bank of America inspired me to apply. They emphasized how your mentorship programs and collaborative environment fueled their professional and personal growth, broadening their critical thinking and networks. I am eager to learn from your diverse teams, contribute to innovative financial solutions, and grow as a professional in a dynamic, client-focused setting.

I am confident that my technical expertise, analytical mindset, enthusiasm for teamwork and eagerness to improve my knowledge make me a strong fit for this role. I look forward to the opportunity to discuss how I can contribute to Bank of America's mission of driving responsible growth. Thank you for considering my application.

Sincerely,

Kwame Nkuah Tawiah
